DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102(b) that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Padovani et al. (WO 99/23844-in IDS record), hereinafter referred to as Padovani.

Regarding claim 1, Padovani discloses a method and apparatus for high rate data transmission.

means for generating an estimate (The mobile 6 inherently generates a C/I estimate by using the FAC bit, see page 40, lines 11-28) *of whether transmitting a data request information signal would result in selection of the access terminal by the access network* (the mobile station 6 performs the C/I measured on each received pilot signal, and selects a base station for accessing base on this measurement, see page 46, lines 15-39) ; *and*

means for reducing the power of signals transmitted by the access terminal apparatus based on the estimate (the mobile station inherently decreases the transmit power if any one of the received FAC or RPC bits commands the mobile station to decrease the transmit power, see page 40, lines 5-28, and table 4).

Allowable Subject Matter

3. Claims 1-40 are allowed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yoshida et al. (US 5,734,647); Haartsen (US 5,491,837); Bruckert (US 5,038,399) are cited to show a method and apparatus for reducing transmission power in a high data rate system, which is considered pertinent to the claimed invention.
